

Model 844 Mechanical Floor Scale with wheels

The 844 is a high quality floor scale with a mechanical reading dial of diameter 570 mm.

The dimensions of the loading platform are 1000mm x 1000mm. The loading platform is made up of a steel heavy duty plate with a tubular protection for the column.

The internal levers are made up of AQ42 steel with bearings and knives in Ni-Cr-Mo steel with hardness 63-65 HRC.

The oscillation of the dial is adjustable through a shock absorber with oil and a mechanical regulator.

The structure is oven painted with epoxy enamel or it can be supplied optionally as fully stainless steel or with only a stainless steel loading platform.

For portability, the 844 is supplied with 4 wheels and 4 adjustable feet.

Model 844 Mechanical Floor Scale with wheels

Platform (mm)	Capacity (kg)	Division (g)	Overall dimensions LxPxH
1000x1000	150	50	1000x1250x1780
1000x1000	200	50	1000x1250x1780
1000x1000	300	100	1000x1250x1780
1000x1000	400	100	1000x1250x1780
1000x1000	600	200	1000x1250x1780
1000x1000	800	200	1000x1250x1780
1000x1000	1000	500	1000x1250x1780
1000x1000	1500	500	1000x1250x1780
1000x1000	2000	500	1000x1250x1780

Available options

- AISI304 stainless steel loading platform and tubular column
 - Fully AISI304 stainless steel version
 - Double reading dials
 - Zinc plated levers
 - Painted or stainless steel folding loading platform
 - Painted or stainless steel hanging rail with hook
 - Tare bar with one dial round capacity
 - Loading platform 1200x1200 mm
-
